1. The preliminary amendment filed Sept. 3, 2004 has been entered.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1-31 and 39-44, drawn to a method of determining degradation of a polymer, a degradation sensor for a polymeric structure or a polymeric structure.

Group II, claim(s) 32-38, drawn to a method of determining degradation of a first polymer, a condition-sensing electrical cable, a condition-sensing building component or a condition sensing vehicle.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I has the special technical feature of having conductive particles in the polymer being monitored

Art Unit: 2856

which is not required in Group II. Group II has the special technical feature of having conductive particles added to a second polymer which is not required in Group I as evidenced as such at most being claimed only in base claims 1 and 39 of Group I and not the other two base claims of Group I, claims 17 and 25.

5. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
